

# Smooth panel, with inserts and bands

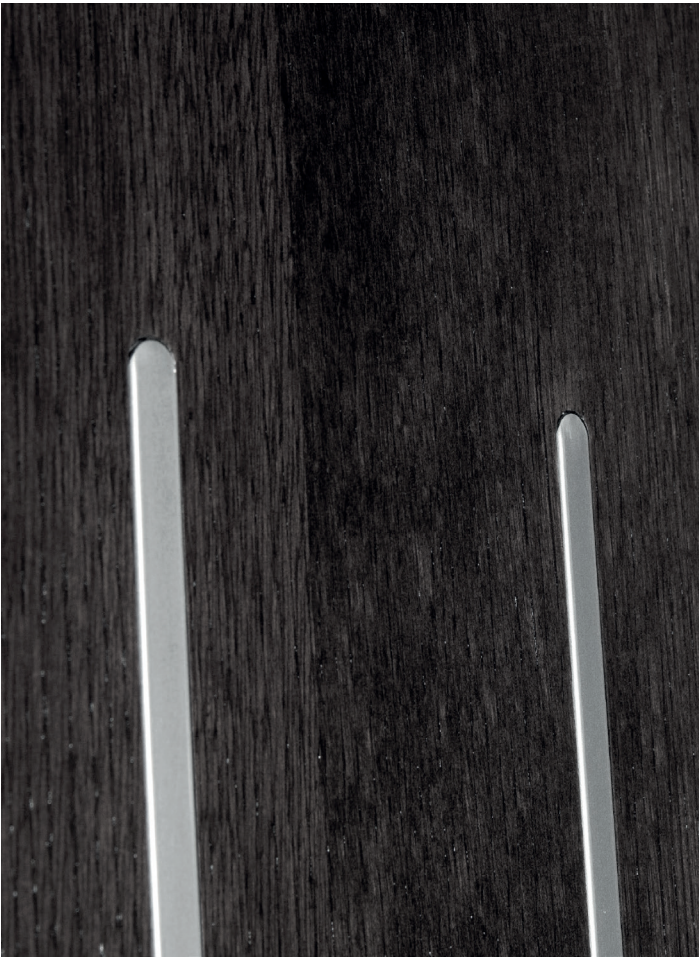

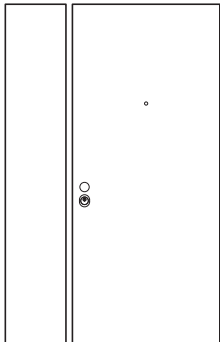

*Panneau lisse, avec  
inserts et bandes*

Smooth covering panels, veneered in fine wood or lacquered, dress Vighi armoured doors with a contemporary and minimalist style. By incorporating metal inserts or bands that further highlight the geometry of the design, the coverings gain added personality. Vighi offers various solutions, but custom panels can also be studied and created to meet non-standard requests.

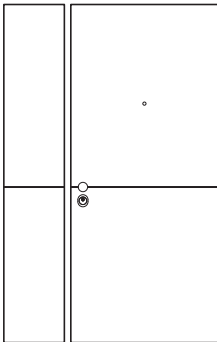

*Les panneaux de revêtement lisses, plaqués en bois noble ou laqués, habillent les portes blindées Vighi dans un style contemporain et minimaliste. Grâce à l'ajout d'inserts ou de bandes métalliques qui mettent en valeur la géométrie du design, les revêtements gagnent en personnalité. Vighi propose plusieurs solutions, mais il est également possible d'étudier et de réaliser des panneaux selon des demandes hors standard.*

# Panel with applied mouldings

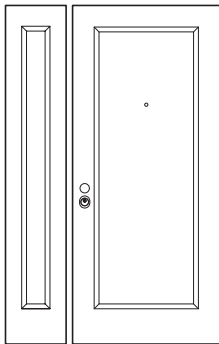

## Panneau avec moulures rapportées

Thanks to the technique of applying mouldings to the flat panel, it is possible to create stylistic solutions that evoke an elegant classicism. Three types of decorative mouldings are available, allowing the creation of different aesthetics. The mouldings are finished to match the panel, whether in wood or lacquered.

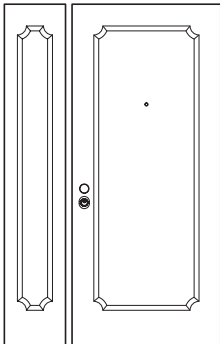

*Grâce à la technique des moulures rapportés sur un panneau plan, il est possible de créer des solutions esthétiques qui donnent une élégante touche de classicisme. Trois types de moulures décoratifs sont disponibles, permettant de réaliser différentes esthétiques. Les moulures sont finis dans le même matériau et coloris que le panneau, qu'il soit en bois ou laqué.*

# Routed panel

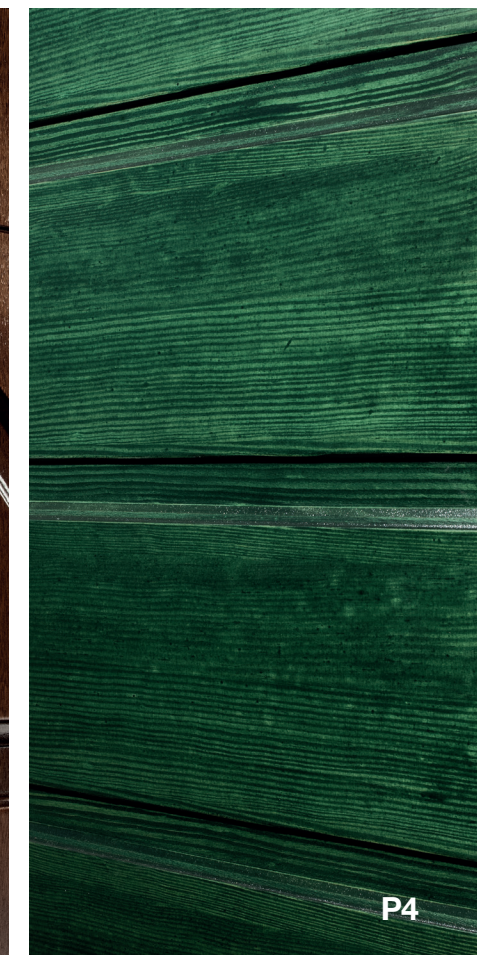

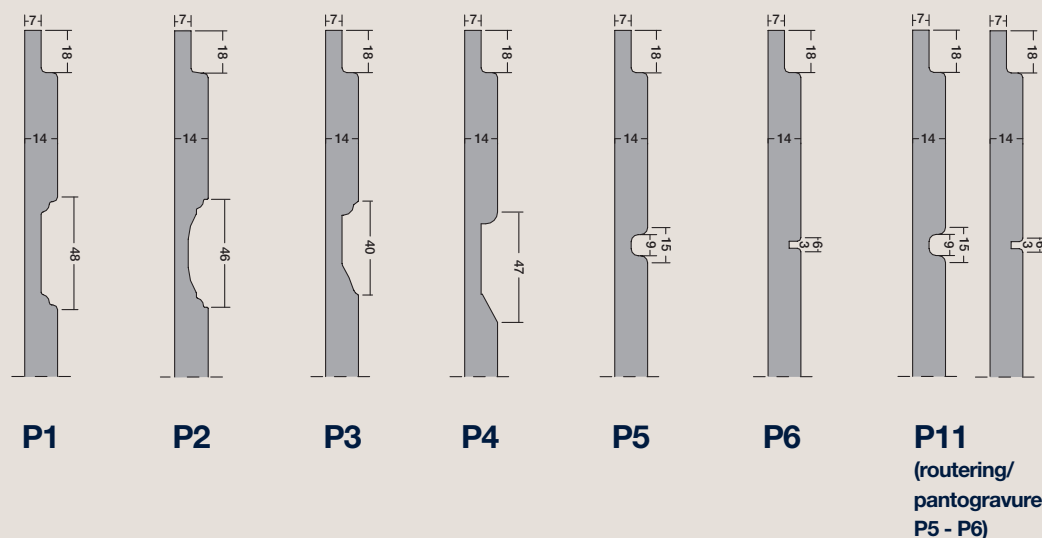

## panneau pantographé

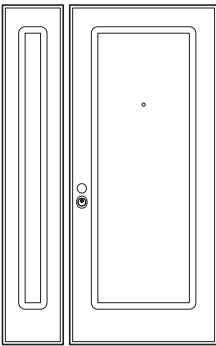

With the technique of routing marine plywood panels veneered with fine wood, it is possible to create both internal and external coverings of great aesthetic quality and elegance. Routing allows the creation of an infinite number of designs, ranging from the most classical to Art Deco styles, as well as more rustic or contemporary solutions.

*Grâce à la technique de pantogravure sur panneaux en contreplaqué marine avec placage en essence de bois noble, il est possible de réaliser des revêtements intérieurs et extérieurs d'une grande qualité esthétique et d'une grande élégance.*

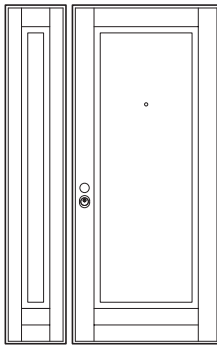

*La pantogravure permet de réaliser une infinité de motifs, allant des plus classiques au style Art déco, jusqu'à des solutions rustiques ou contemporaines.*

# Wood types for interior and exterior panels

## *Essences de bois pour revêtements intérieurs et extérieurs*

For the creation of the panels for Vighi security doors, a carefully curated selection of the finest wood species has been made, in line with interior design trends. These are also available in the "mat" version, which gives the panel a more contemporary allure and best expresses the natural beauty of the wood.

*Pour la réalisation des panneaux des portes blindées Vighi, une sélection rigoureuse des meilleures essences a été faite, en accord avec les tendances du design d'intérieur. Proposées également en version "mat", elles confèrent au panneau une allure plus contemporaine, exprimant au mieux la naturalité du bois.*

# RAL lacquered

## laqué RAL

Each panel can be lacquered in any RAL color, in both glossy and matte finishes. Vighi offers a selection of colors that best align with contemporary tastes.  
Lacquer finishes can be applied to a smooth panel or with an "open-pore" effect on oak or ash wood.

*Chaque panneau peut être laqué dans n'importe quelle couleur RAL, en version brillante ou mate. Vighi propose une sélection de teintes en accord avec les tendances contemporaines.*  
*Les laquages peuvent être réalisés sur panneau lisse ou avec un effet « pore ouvert » sur bois de chêne ou de frêne.*

Vighi and Cosentino have teamed up to combine the timeless beauty of Dekton surfaces with the unbeatable strength of Vighi security doors. This cutting-edge material enhances both the interior and exterior panels, creating a seamless visual connection with the surrounding architecture. The result is a perfect fusion of elegance and resilience—Viguard® doors built to last as long as the home itself.

*Vighi et Cosentino ont lancé un projet commun pour intégrer dans aux portes blindées indestructibles Vighi l'esthétique séduisante et la durabilité des plaques Dekton, un matériau innovant qui permet, tant pour les panneaux intérieurs qu'extérieurs, de créer une continuité esthétique avec l'architecture. Une solide alliance de deux excellences qui garantit aux portes blindées Viguard® une longévité égale à celle de la maison qui les accueille.*

# Aluminium

## Aluminium

Aluminium offers high resistance to atmospheric agents and outstanding long-term durability. The wide range of finishes and colors—from matte RAL tones to metallics and wood effects—allows to meet any design requirement and stylistic customization.

In addition to the proposed selection, multiple designs are available in both classic and modern styles, with finishes offered in the following thicknesses:

- 7 mm with Pyral insulation
- 31 mm KOVER Extratherm

*L'aluminium garantit une haute résistance aux conditions atmosphériques et une grande durabilité dans le temps. La large gamme de finitions et de couleurs, allant des RAL mats aux RAL métalliques, jusqu'aux effets bois, permet de répondre à toutes les exigences de conception et de personnalisation stylistique.*

*Outre la sélection proposée, de nombreux dessins de style classique ou moderne et finitions sont disponibles dans les épaisseurs suivantes :*

- 7 mm avec isolation Pyral*
- 31 mm KOVER Extratherm*
