

Solid wood panel

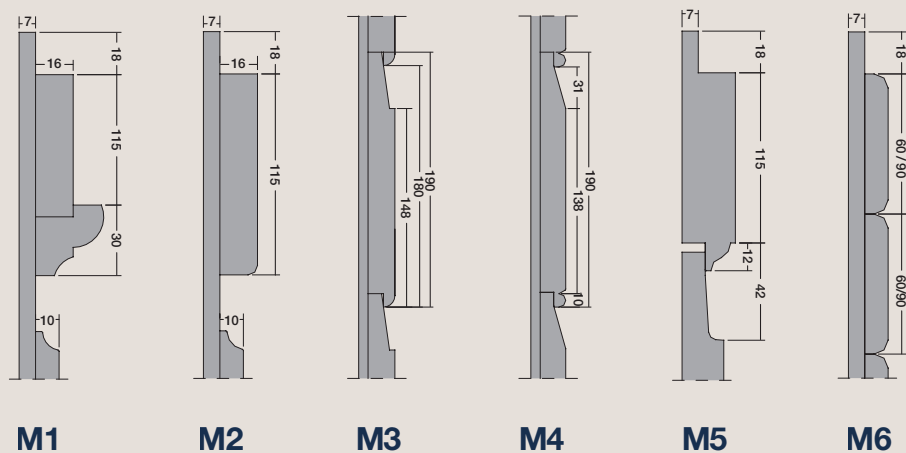

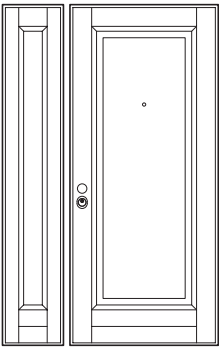

Panneau menuiserie

Solid wood panels are made of solid wood with styles and essences carefully selected to enhance both the building and the door itself. Customizations are also possible on the inside, to replicate the same aesthetic as the exterior on the wooden panel.

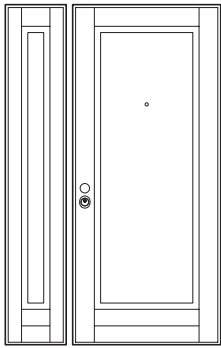

The knowledge and skill of the Vighi carpenters allow them to create unique and customized panels.

Les revêtements de menuiserie sont réalisés en bois massif, avec des styles et des essences soigneusement sélectionnés pour mettre en valeur à la fois le bâtiment et la porte. Des personnalisations sont également possibles côté intérieur, afin de reproduire sur le panneau en bois la même esthétique que l'extérieur. Le savoir-faire et l'expérience des menuisiers Vighi permettent de créer des panneaux uniques et sur mesure.

Thanks to the know-how developed over time by the skilled Vighi carpenters, it is possible to recover and restore an entrance door with historical and artistic value, preserving the historical authenticity of both the door and the building itself.

Detailed work is carried out on the original door, allowing the security door to be hidden inside, silently adding maximum efficiency in terms of functionality and security.

Grâce au savoir-faire développé au fil du temps par nos menuisiers expérimentés, il est possible de récupérer et restaurer un portail d'entrée à valeur historique et artistique afin de préserver l'authenticité du portail et du bâtiment lui-même.

Sur la porte d'origine, des travaux minutieux sont réalisés, permettant à la porte blindée de s'intégrer parfaitement, avec une efficacité maximale en termes de fonctionnalité et de sécurité.
