

# Glass

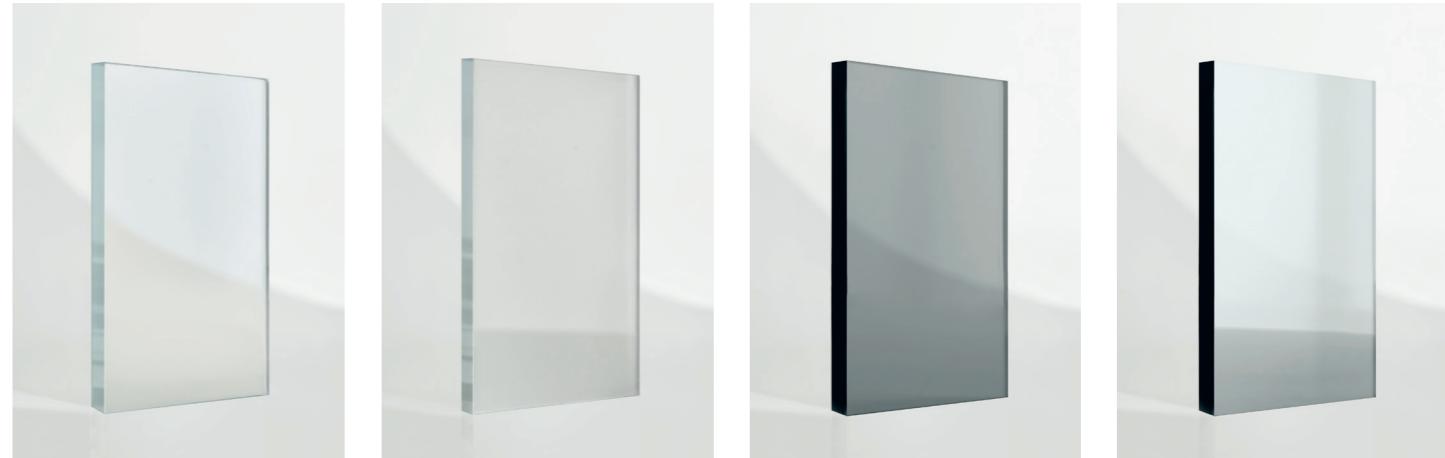

## Vitrages

For its Viguard® security doors, Vighi offers a refined selection of glass options to be used in panel windows as well as fanlights and sidelights. These are safety glass types that combine the sophistication of decorative interior design glass.

It is recommended to pair clear glass with natural wood species, grey glass with cool-toned panels, and bronze glass with warmer-toned finishes.

*Pour ses portes blindées Viguard, Vighi propose une sélection élaborée de vitrages à utiliser aussi bien pour les parties vitrées internes aux panneaux que pour les impostes et les côtés vitrées.*

*Ce sont des vitrages combinant sécurité et esthétique. Il est conseillé d'associer les vitrages neutres aux essences de bois naturelles, les vitrages gris aux panneaux aux tons froids, et les vitrages teintés bronze avec des finitions aux tons plus chauds.*

# Grates

## Grilles de sécurité

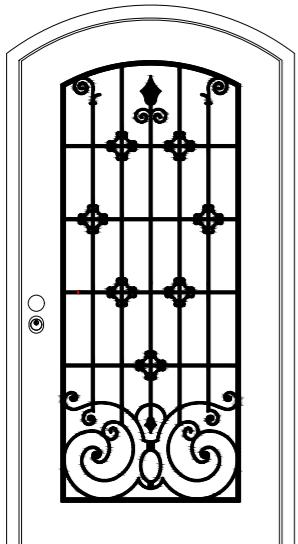

Within windows or fanlights, it is possible to install grates that, in addition to providing an extra level of security, evoke a traditional rustic or classic style, in line with the best Italian architectural tradition.

The grates can be custom-designed or selected from the Vighi portfolio of creations. It is also possible to restore an existing grate and integrate it into the new door through meticulous craftsmanship by Vighi's artisans.

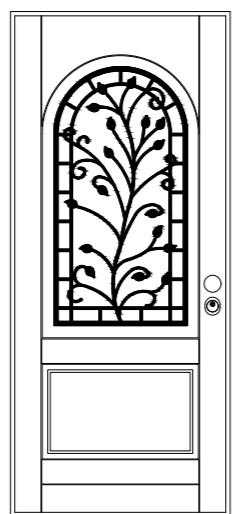

*À l'intérieur des vitrages ou des impostes supérieures, il est possible d'intégrer des grilles de sécurité qui, en plus d'assurer un niveau de protection supplémentaire, donnent une note de style rustique ou classique, selon la meilleure tradition architecturale italienne. Les grilles peuvent être réalisées sur dessin personnalisé ou choisies parmi les créations du portfolio Vighi. Il est également possible d'étudier la récupération d'une grille existante et de l'intégrer à la nouvelle porte grâce au travail minutieux des artisans Vighi.*
